

KJ-N1002 Necklace

The primary feature of Polki jewellery is the use of uncut or rose-cut diamonds. These diamonds are in their natural, unaltered state and have a flat base and a faceted, domed top. They are known for their unique, antique-like appearance..

Product Description

Polki Kundan elegant Necklace 18 Karat yellow gold powered by kadel Jewels and gross weight 80.4 Grams. The head of the necklace showing very delicate and royal design. The necklace also features the gold purity and the weight of the necklace. The high-polished finish adds a lustrous appeal to the necklace. The weight of Polki diamonds can vary, but they are generally heavier than traditional, fully cut diamonds. Polki diamonds can weigh anywhere from 2 to 20 carats each, depending on their size and quality. Elaborate designs with intricate detailing can add to the overall weight of the necklace, as more material is used in creating the framework and settings. In one necklace you will be multiple best metal and stones.
